Optive®

GEL DROPS

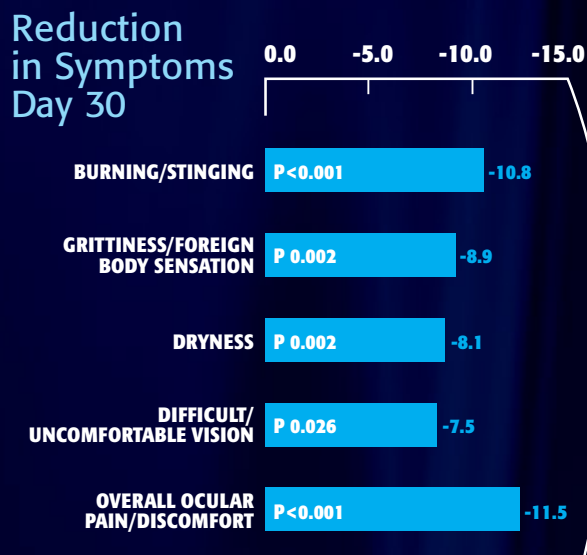

Lubricant Eye Gel

Sheer comfort any time — day or night.

REFRESH OPTIVE® Gel Drops are a new aqueous gel that deliver long-lasting symptom relief. In a clinical study, the gel significantly reduced common Dry Eye symptoms in 30 days,¹ as shown in the chart on the right.

¹One-month, multicenter, double-masked, randomized study in patients with Dry Eye (n=94). Patients were assessed at baseline and at all follow-up visits (days 7, 30). Current Symptom Survey was completed at each visit to measure the ocular symptoms over the past 24 hours.

Advanced formulas. Lasting relief.

Like REFRESH OPTIVE® Advanced and REFRESH OPTIVE®, REFRESH OPTIVE® Gel Drops are expertly formulated to provide your patients with long-lasting Dry Eye relief. These innovative formulas:

Contain CMC, which binds with surface cells to maintain ocular surface moisture for prolonged relief.

Are made with Glycerin and compatible solutes. Together they provide enhanced hydration while creating a soothing shield, which safeguards the ocular surface and epithelial cells from hypertonic stress.

Are preserved with safe and gentle PURITE.®

Do not require shaking before use, aiding in patient ease of use.

Every package of the REFRESH OPTIVE® product line purchased directly benefits first responders.†
